

MARBLEHEAD MUNICIPAL LIGHT DEPARTMENT

Issued: Dec. 14, 2022
Effective: January 1, 2023

MDPU-82
Cancels MDPU - 70

Rate G Water Heating (Existing Customers only – No New Installations)

Available for electricity used for heating water in approved storage type tanks of not less than 50 gallons capacity, where conditions permit supplying such water heating during off-peak hours without requiring additional distribution system investment by MMLD, and subject to the following conditions:

1. Heating element capacity shall not be less than 4500 Watts
2. The customer shall wire to the water heater using approved cable or conduit and provide a trough with wire to a separate meter socket. The meter and time control will be supplied by MMLD, subject to the continued availability of equipment
3. Service will be supplied under this tariff only during such hours as MMLD may determine from time to time to meet the conditions affecting the spare capacity available for this service but, in any event, not less than (18) eighteen hours daily.

Monthly Charge

| | | |
|----------------------|-----------|-------------------|
| Basic Monthly Charge | \$ 8.25 | per Month |
| All kilowatt-hours | \$ 0.1482 | per kilowatt-hour |

Terms and Conditions

1. The Department's most current Terms and Conditions for Electric Service are in effect and part of this tariff, when not inconsistent with any specific provision of this tariff.
2. All kilowatt-hour usage under this tariff is subject to the MMLD Purchase Power Adjustment Clause in effect.
3. All Terms and Conditions of this tariff are subject to applicable law.
