

NEXTZERO
EXPERIENCE WHAT'S NEXT

Commercial & Industrial Program

Through the NextZero program, Marblehead Municipal Light Department (MMLD) offers energy audits to help commercial and industrial (C&I) customers identify energy savings measures that lower energy usage and reduce energy costs. Armed with an audit report, C&I customers can create a plan with the help of a local contractor to implement energy savings measures and submit applications for rebates to help reduce the costs of measures from MMLD. MMLD offers two different types of programs to help C&I customers implement energy efficiency upgrades.

CUSTOM RETROFIT PROGRAM

MMLD's Custom Retrofit Program is ideal for C&I customers who are interested in general energy efficiency upgrades, but do not have a specific project in mind. C&I customers submit an application to be enrolled into the program. Once the application is received, the NextZero team will work with the customer and their preferred contractors to fully define work scopes for the recommended projects, including a cost-effectiveness evaluation based on estimated annual energy savings.

NEW CONSTRUCTION AND MAJOR RENOVATION PROGRAM

There is no better time to plan energy savings than when planning a new construction or major renovation project and MMLD offers a NextZero program to help C&I customers plan such projects. C&I customers may qualify for co-funding of technical services, custom incentives, or prescriptive rebates to help maximize the efficiency of their project.
